

Eugene and Springfield Demographics

By: Ali Carmichael
ADS4SJ

Background

CAHOOTS (Crisis Assistance
Helping Out On The Streets)

CAHOOTS calls from 11 different
zip codes

Four different demographic groups:
age, income, education, and race.

Research Questions

What populations is
CAHOOTS serving?

How do these
populations differ
between Eugene
and Springfield?

Methods

**What populations is
CAHOOTS serving?**

Create call volume
quartiles and
calculate averages

Call volume by zip
code

Variable correlations

Calls per 1000
people

Methods

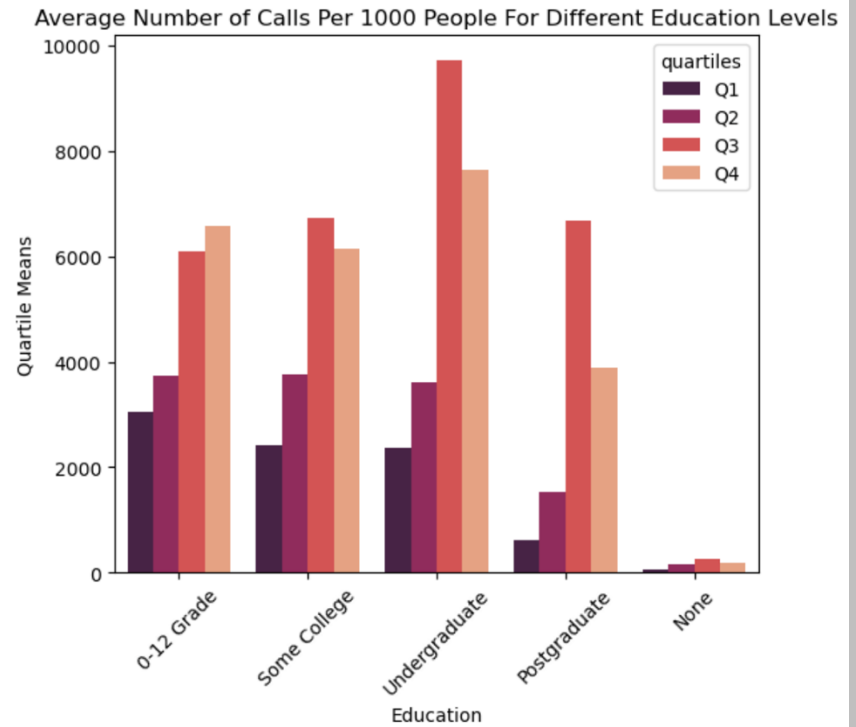

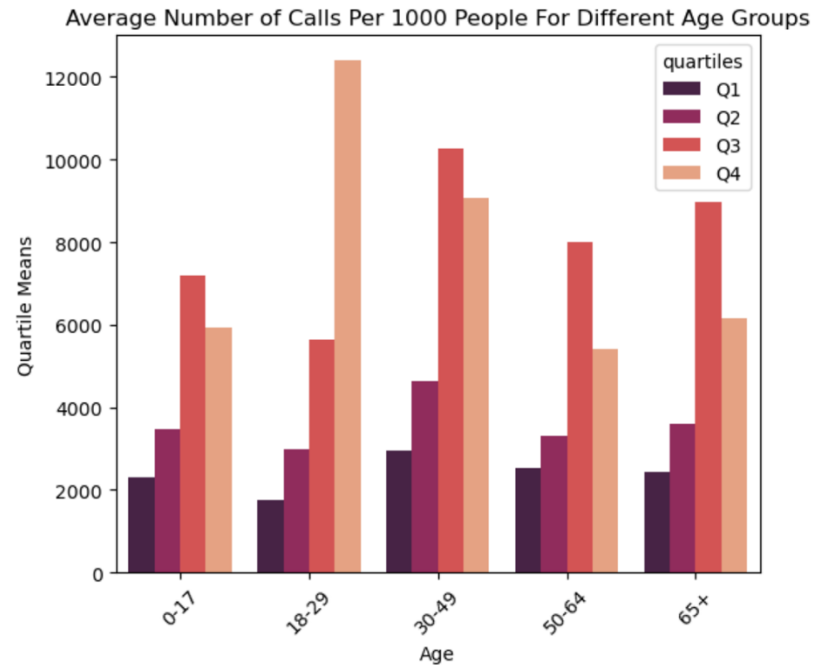

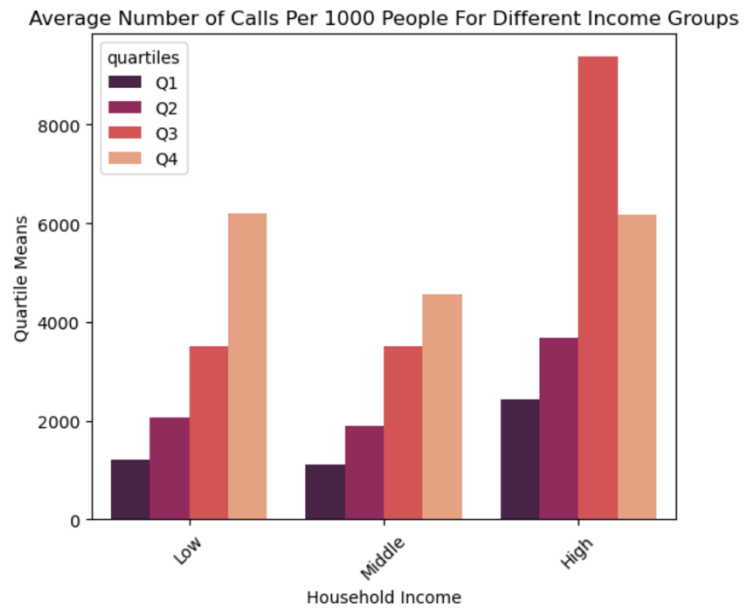

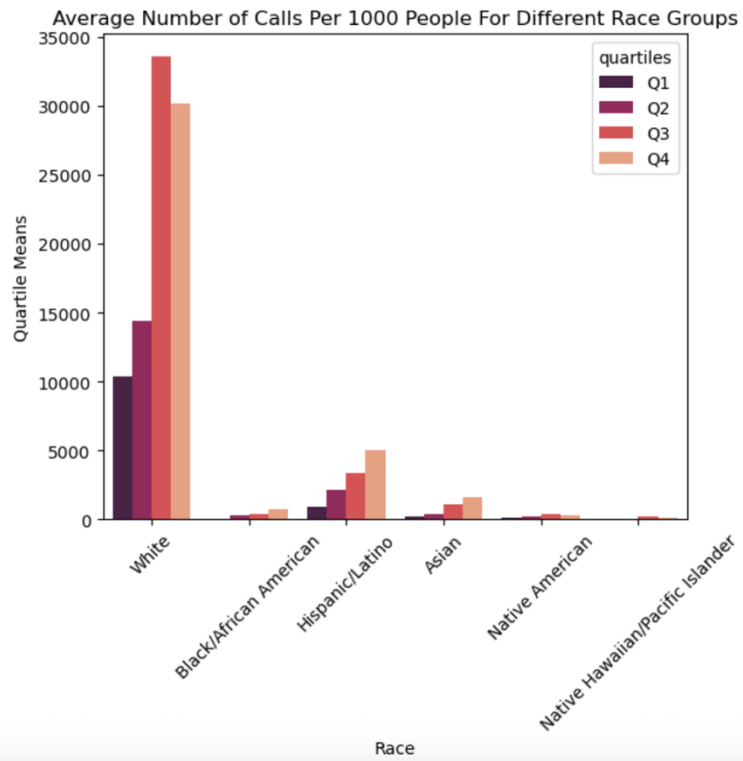

Chi squared
test function

How do these
populations differ
between Eugene and
Springfield?

Call volume by
zip code

Classify entries
by city function

Calls per 1000
people

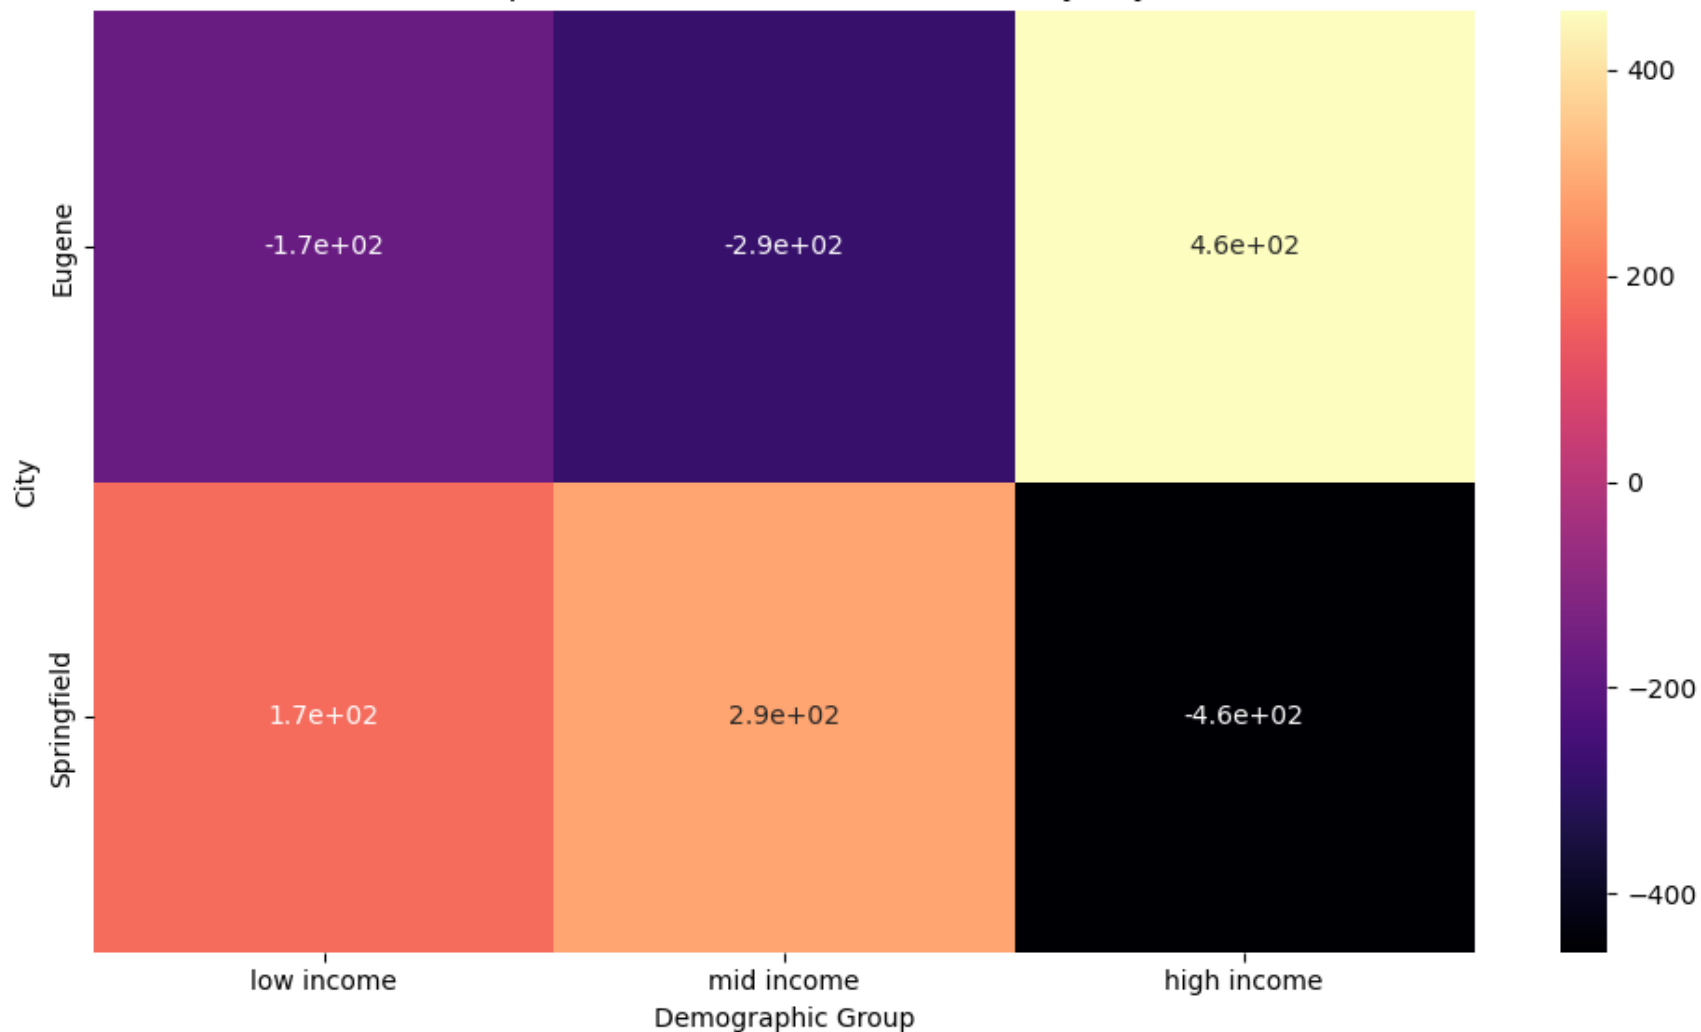

Results

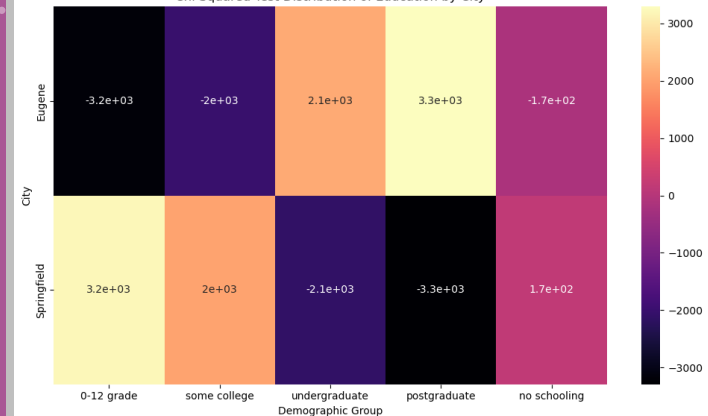

Results

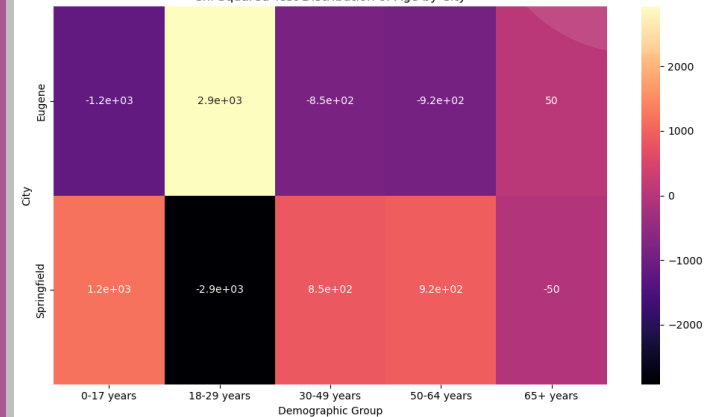

Chi Squared Test Distribution of Income by City

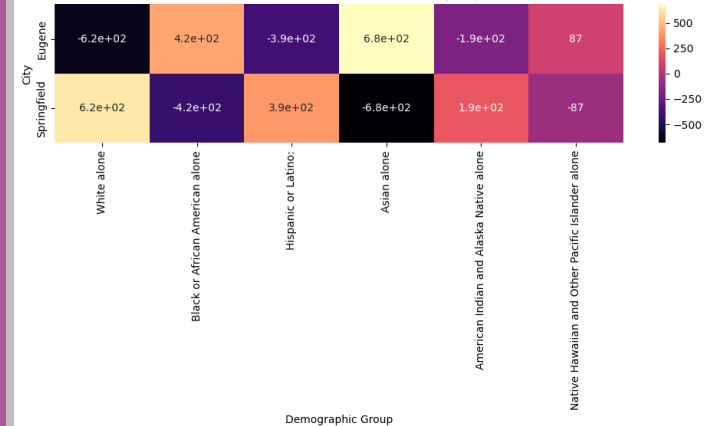

Chi Squared Test Distribution of Education by City

Chi Squared Test Distribution of Age by City

Chi Squared Test Distribution of Race by City

Discussion

18-29 age group has the highest call rate in high-call areas and Q4 is relatively consistent across all demographics

Many demographic groups are severely underrepresented in both Eugene and Springfield.

There are more zip codes for Eugene than Springfield

Demographic data is not directly related to call data

Call type and demographics?
